Experiment No: 06 Sequence Diagram

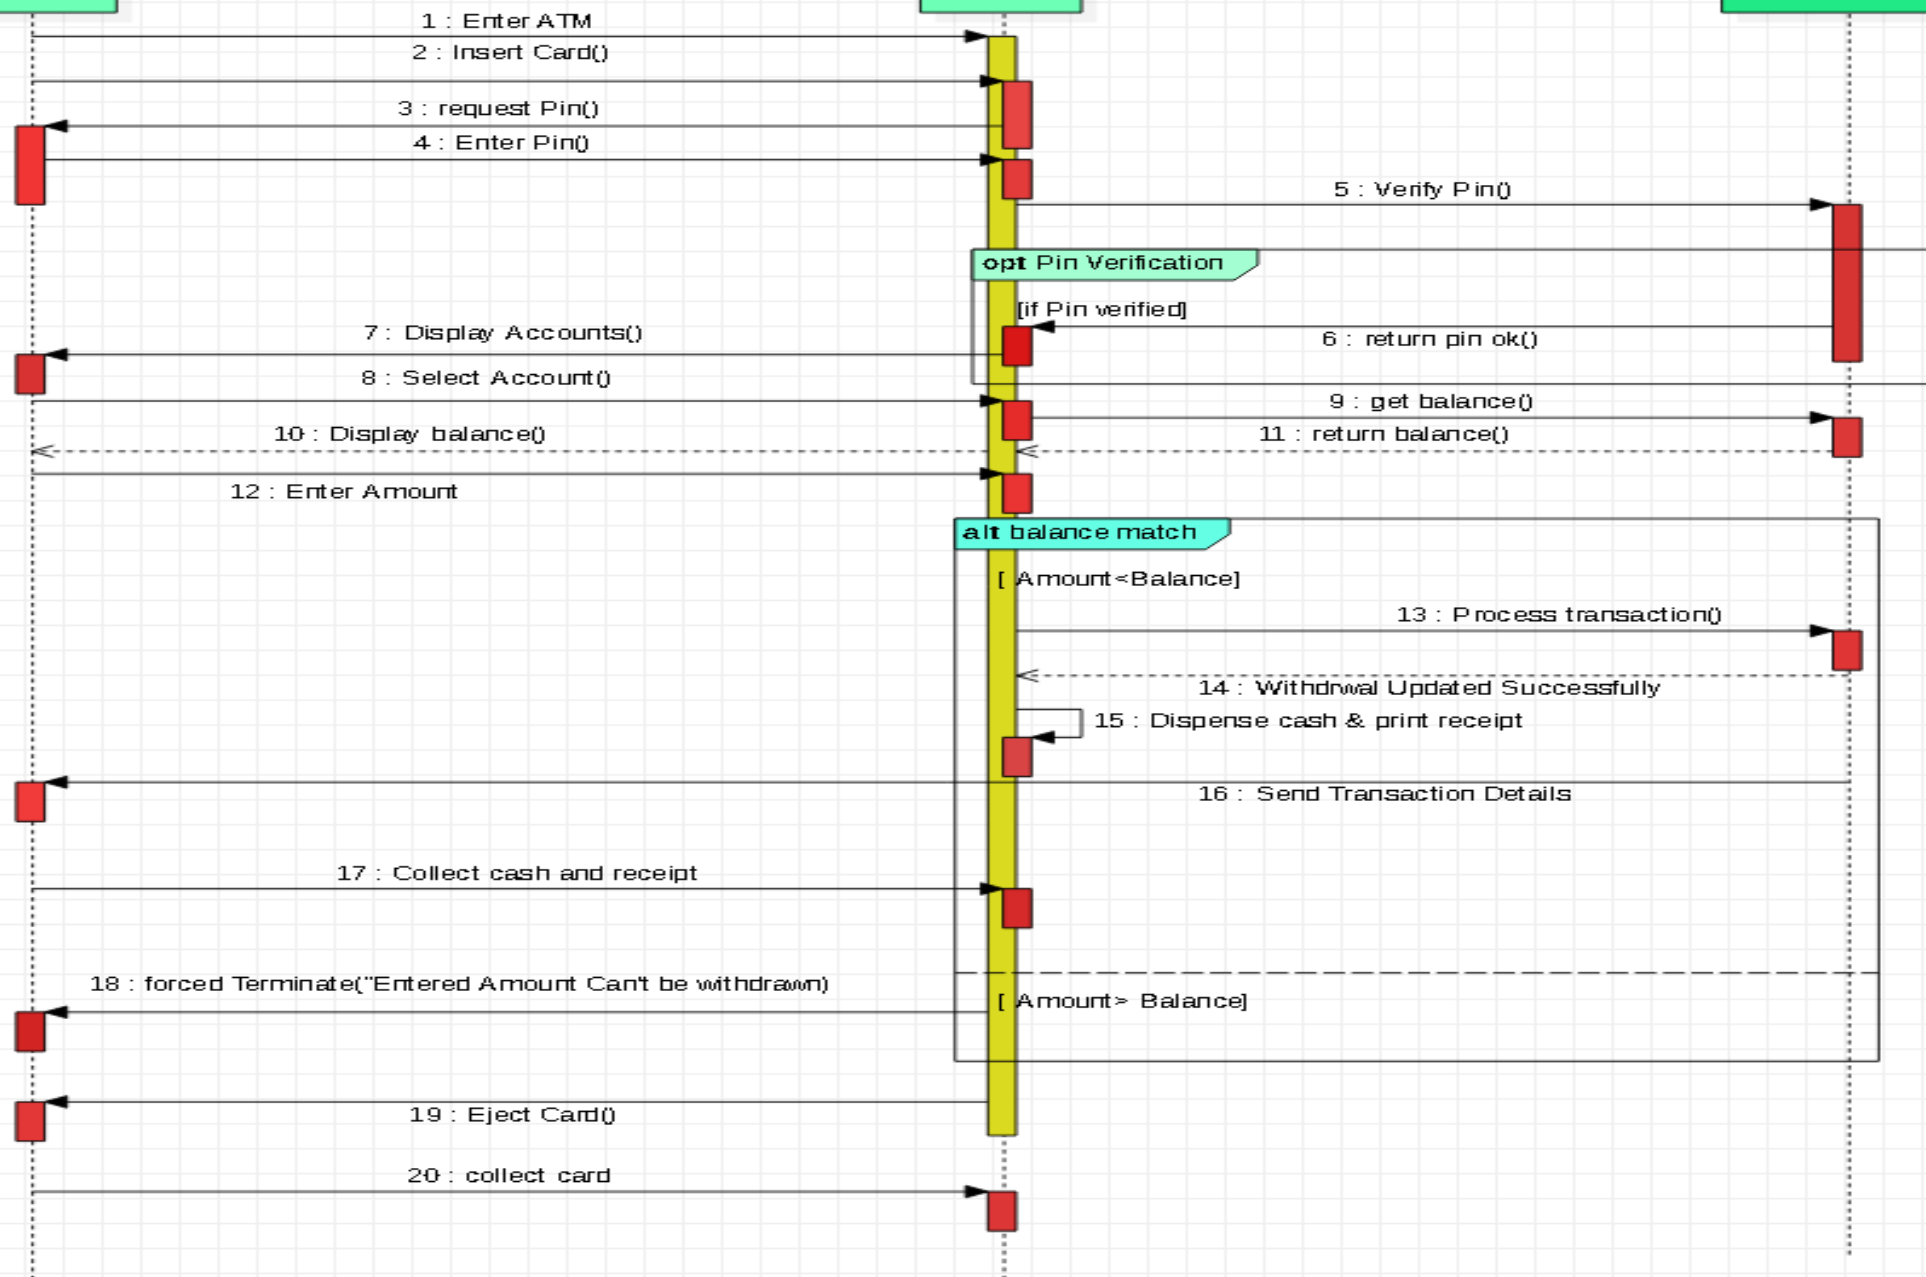

a) Develop a system in terms of accessing ATM. To develop an ATM System for ABC Bank The System developed should contain the following features

1. The Customer login into the system using Credit Card No or Debit Card no and Pin Number. The system checks for validation.
2. The System queries the customer for the type of account either Saving Account or Credit. After getting the type of account the system shows the amount left.
3. The System then queries the customer for required amount. The user enters the amount and gets the money.
